To Whom It May Concern:

Letter of Reference for
Alan Osborne
and
VCIT Consulting

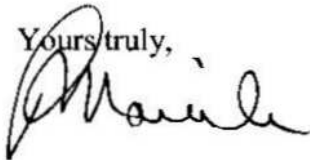

We have had the opportunity to work with Alan Osborne of VCIT Consulting since October 2006.

Our organization had been encountering significant problems with breakdowns and a lack of accountability from technicians. We were also spending too much money maintaining our systems. Costs were becoming unpredictable and budgeting was becoming an arduous process. Our management team was spending too much time coordinating computer issues.

In consultation with Alan, we moved to a Managed Remote Desktop Solution. Our management team has been able to delegate all computer issues to VCIT Consulting with confidence that the computer systems will be proactively managed and that issues will be dealt with expeditiously and effectively. VCIT has provided exceptional service and our confidence in the stability of our computer systems have been restored. The freedom to access all of our applications and data over the web from any computer has also been of benefit. Finally, we are able to easily budget for computer related expenditures as VCIT Consulting provides us with these services at a fixed monthly cost.

I am happy to recommend VCIT Consulting to any organization looking to solve their computer related issues.

Yours truly,

Mr. Rennie Maierle
District Program Principal
Burnaby School Board
District #41
